This post is to notify all those that have posted in this thread, that I have lied to you. Yes, I have downloaded a 'really old bypass' and attempted to use it...soley to see if it actually worked (admittedly I had my doubts). Knowing me as well as many of you do, I do hack, but only to better myself as a moderator. This is what I was trying to do, as the HT servers never ran RG and I have seen evidence that it can be hacked, I wondered was it really that easy? I had no idea of the concequences - shows how much I know about Renguard. I extend my sincerest apologies to Crimson, and offer her my best wishes with her future endeavours.
