CrazyBastard wrote on Mon, 31 October 2005 03:14 This post is to notify all those that have posted in this thread, that I have lied to you. Yes, I have downloaded a 'really old bypass' and attempted to use it...solely to see if it actually worked (admittedly I had my doubts). Knowing me as well as many of you do, I do hack, but only to better myself as a moderator. This is what I was trying to do, as the HT servers never ran RG and I have seen evidence that it can be hacked, I wondered was it really that easy? I had no idea of the consequences - shows how much I know about Renguard. I extend my sincerest apologies to Crimson, and offer her my best wishes with her future endeavours.

and you think people are going to buy this "explanation " huh

you've been around long enough to know ANY attempt to bypass results in a ban from renguard
