They "start at \$4450." So if he got a mid range one it probably cost more than that. Should of just saved the 2000+ dollars and learned how to overclock. A 3200+ comes much cheaper than that FX55(by like \$600 or more) and can easily reach the same speeds or greater. Same with the RAM, and instead of SLI'd 6800s I'd just get one 7800GTX.

Oh well, as long as you're happy with your decision I guess that's all that matters.
