Seeing that many people want this:

- Core Patch option removed, we can download ourself
- Options button removed
- Smaller interface
- No Site loading
- Instead, MOTD button where it said buttons
- Password and auto-run entry on the main window... (if it cant, a small, small, small option button somewhere, and a small window pops up.)

That's what many people want. But of course the release of 1.04 comes first. 1.05 could have both a normal version and lite version. (I think, if we have a lite version, normal version would be obsolete, so consider this light version as the better and faster version of Renguard...)

No functions are removed and it's faster and easier..
