WarZman wrote on Mon, 07 November 2005 08:40Where are the promise programs ???  
from brenbot 1.32 there is a line that comes with the standard config of Brenbot.  
Teamspeak Regulator coming sone!!! (I have started my own project for a Teamspeak bot but  
thats just Mirc scripting and ask sometime huge cpu's when a command is to difficult.)  
thats about the 2 or 3 years thats saying and i never saw something of it :S.  
and also there are no updates of Renhawk.  
can someone give me more info over beta release of the programs it will be nice.

Yeah Blazer was meant to be doing the kinks in the TSR project a few weeks ago. However due  
to problems with his pc and a busy work and life schedule he has fallen behind on it. I was due to  
help him test TSR on teamspeak 2 weeks ago, but unfortunately I wasn't available so I don't know  
if he did any work on it (i.e testing) as very few people were using the NS teamspeak server and  
playing ren. For TSR to be tested correctly you must be doing both.
