Uhhh, With Windows Firewalls I actually just meant the Windows Built in Firewall which comes with SP2, and was already in but with less options and which is also built in Windows Server 2003.

Thanks for clarifying...I agree, the windows (builtin) firewall sucks. But then again, at least they are trying. I imagine they didn't want the support nightmare of old ladies calling up saying "muh online bridge card came wont connect to thar intarweb".
