To the best of my knowledge, XWIS has not yet taken over WOL.

In any case, the fact that you are using the XCC program to connect indicates that you are using XWIS. If you do not see any servers, then close Renegade and launch it again. Log into WOL and this time, pay attention to the MOTD. If your password is incorrect, you will be notified in the MOTD window instead of an invalid login dialog.

Let us know once you've verified that your password is correct or not.
