I am running windows XP Professional and when ever I try to install Renegade I get the auto run and when I click Install it comes up with a white window with Renegade Setup in the title bar and then a get an error message that looks like this "Setup has encountered a problem and needs to close. We are sorry for the inconvienece.

If you were in the middle of something, the information you were working on might be lost.

Please tell Microsoft about this problem

We have created an error report that you can send to us. We will trear this report as confidential and anonymous
