Ma1kel wrote on Sat, 12 November 2005 11:04Go to "options" in the RenGuard menu and enable the option: "Disable Core Patches.

Now manually download the CP1:

http://download.renguard.com/standalone_cp1.zip
Thank you, that worked.
o_O I wonder why it was doing that though...
Mac, I wasn't using a proxy, it just was doing that whenever I tried to install CP1. I wasn't doing anything besides that. Kinda odd. And then the next day, it just crashed after it started to try to dl patchw.zip.
