This?

Great tool, it works pretty well. It does contain bugs, but its a beta anyway.

If you !rg without a value, it says " Player is not running renguard"

And one option that should be added is that when you enter a part of the name (like if name was hax0r and you type hax or x0r or 0r or whatever) it would search for the full name.

!nonrgplayers could be added too (!nonrenguard)

I prefer !rgp and !nonrgp (RenGuardPlayers) as the commands, faster to type too.

Oh, and one missing feature... Is there even a !forcerg command?
