Nineball wrote on Wed, 16 November 2005 16:34 Too bad LCDs have to run at their native resolution or the graphics will look like shit. For the higher end LCDs, they require 1600x1200 and higher (19 inch+). You'd need some powerful hardware to play many of the newer games at that resolution.

He's right about that, and that's another reason why I have never bought an LCD screen yet.
