trooprm02 wrote on Mon, 14 November 2005 18:54Ok, when I start up rengaurd I get the "Can't create serial hash" error. When I go to regedt32/Software/Westwood/Renegade, I am unable to enter my second s/n, or even re-enter the same!
I was able to do this just yesterday, but now I keep getting "can't change key value"

I know when you instaill renegade, it hashes it so it does not appear as the same key there, but I have this problem before and that has fixed it

Still need help
Anyonw having the same problem?
