c0vert7 wrote on Mon, 21 November 2005 16:37Ok heres my issue, every time I play renegade I play for about a few hours than I leave and right when I hit quit renguard like freezes renegade which in return freezes my computer to renegade screen. Than I get the error report after I finnaly get it unfroze after about 5 minutes of messing with it. Any idea how to fix it. Also if it may be this, I have edited renegade so you dont need to have any confirmation messages, which is done through regedit of course,could that be the problem??

How do you know it's RenGuard that is freezing Renegade?
