Hey all,

A couple buddies and myself are planning on playing some renegade later on today. I wanna set my other PC up as an FDS for us to play on, since it would be local, and I have a pretty considerable bandwidth to play with (2.5 mbps download, 1024 kbps upload) so I could make a pretty reasonably sized game.

Is it any different than before when we ran on WOL? What about keycodes, is there any way to get one for an FDS anymore?

Thanks!

Russ
