If you say !rglocate IKA on the bot..

What if there's more than one person with 'IKA' at the start of the name? Will it return every player on the network with a name that begins with 'IKA', will it not return anyone, or will it return the first player it finds?

Also if i'm to get this right.
IF your name is on the ignore file for a server, the SERVER will say you are using renguard REGARDLESS of whether you are or not.

Hence, you could be NOT using renguard, USING cheats, with your name on the ignore list for the server, and STILL have the server report that you are using renguard...BECAUSE you are on the ignore list.
Is that right?
If so that's something that should be looked at for the next version of RG...people who are friends with server owners could get away with cheating...maybe the server should report correctly about everyone, even if they're on the ignore list

It will reply with anyone with IKA within there name no matter if its IKAIKA or hello_im_ika_i_own..

And what your saying IS 100% correct and that is EXACTLY what im accusing IKAIKA of doing.. I will say that again IKA.. I am accusing you of abusing the Server Side of RENGUARD.. I am not saying you were cheating.

Kthx
