havvok wrote on Thu, 01 December 2005 14:38My friend nuked my computer with a virus I had some backup, lost most of everything. I'm just curious, what should I do? Should I:

- A) Nuke him back
- B) Kick his ass
- C) Do nothing and hope he doesn't do it again

If you have a better idea, post it.

Well, if he's your friend, I'd say C, but he can't be your friend if he did that to your computer so here's what you do:

1. Learn from this and trust nobody.
 2. Report him to authorities
 3. Laugh at his ass getting owned by the legal system
