Speaking of that... Recently I was playing that NightOX map or whatever it's called with the bridge and secret tunnels. I was bouncing around on the bridge shooting at an Artillery underneath me. I fell off and directly in the path of the Harvester, which promptly ran me over before I hit the ground.

Oh, and everyone can get splashed to death by an Artillery. I do it when I'm in a tank sometimes. It's no big deal, it happens to everyone. Pros and Newbies alike.
