There are probably some RTS's out there that takes more skill than say counterstrike. But in terms for FPS's it's probably CS. RTS require fast thinking and fast moving. FPS would be mostly about aiming, but like every game some strategy is required to be somewhat good at it. But yeah, definately isn't luck when if i first started playing, i struggled to keep my KD nearing 1. One thing is for sure; Renegade isn't up there on the list
