well he didn't say "capture the flag servers", he is talking about renegade. And considering this game runs around money, wasting 450 on a patch to kill a sniper is pretty retarded. Considering you have a very good chance of just getting shot in the face as soon as you start shooting at him.. soldiers dont give the sniper any money, and soldiers dont get the other team any points.. thats why you should use a soldier against a sniper instead of a patch.
