SlikRik19 wrote on Sat, 10 December 2005 20:06A while back someone released a name exploit fix. (I actually asked this before, but now I can't find it, so I'm asking again.)
1. Where can I get it?
2. Does it work only for FDS or will it work for non-dedicated servers as well?
3. Anything else I should know about it? (Updates and such...)

1) It's now part of SSAOW 1.4
2) It only works for FDS AFAIK
