You see them () running at you with their fearsome rays of blue death - shooting into your skin/vehicle (:gdi:) as you pepper live rounds into their pointing little heads.

Your health goes up - while theirs goes down.

Then they scream "Hacker/Cheater !!!! I died and you didn't!!!!"

For the misinformed - your "repair gizmo" doesn't hurt the enemy.

but - if you want to heal me when i'm killing you -- more, *ahem* blue power for you....

(Oh - i was asked why i'm making posts on common stuff like this - well - i actually played some games (instead of modding) and was SHOCKED on how many new people were doing the same mistakes when the game first came out....)

:sneaky:
