Not directly -

however - good snipers can look for / or listen to the footsteps of SBH's.

and make an snap shot - sometimes resulting in a kill.

also - sometimes SBH's get nicked by nearby enemy fire - so they flicker - and a sniper can see them.

But - if your standing still as a SBH - and nothing is going on around you - your pretty safe -

with that said - there are some places on the map the have glitches that sometimes allow a SBH to be seen (the Nod ref. on canyon comes to mind)

So - rule of thumb for SBH's - stay away from enemy/friendly fire - hiding is your friend.
