---

Whenever I type !rules nothing shows up... I tried almost everything that I could possibly think of, read several things, and no help.

I do have BR connected to the FDS but I can't use any of the commands.

This is my server.

I have BlazeRegulator connected to it.

No mods are running.

I'm using a FDS NOT hosting straight through WOL/GameSpy

I have tried with and without Renguard, even others in my server tried
