What about spend the time for all these posts to work on Renalert? I mean, you lied to us, you said "update today", then soon instead of "today" and still nothing except a message where you tell us 'no clue, forum is down'. You lied to us, we waited a news update. Any progress on Renalert? No a gun and a plane and shotty renders for a whole year... Nice. And yet, you still act as if Reborns the one lying about deadlines
