I didn't list all of the parts, that's just what matters.

I'm also getting a CD R/RW DVDR combo drive, two case fans, a pack of CD-RWs, a surge protector, and a 4-1 combo ATX Tower (includes speakers, keyboard, and mouse).

Without shipping it's about \$750, \$900 with the monitor.

With shipping, it's about \$800, or \$986 with the monitor.
