I made a NR TeamSpeak Plugin (Still working on) ill just paste the readme here, as I am too lazy to type

NightRegulator TeamSpeak Plugin 1.1 by AmunRa
site:www.amunra.net

~~~~~

Thank you for downloading my plugin, I'm sure you will enjoy it!

First, I will list the current features

pretty much everything that goes to IRC goes to teamspeak

ability to turn off team chat

ability to disable server pages

ability to disable all chat

~~~~~

NOTES:
YOU MUST BE A SUPER SERVER ADMIN TO USE THIS!!!
YOU MUST USE NR VERSION 2.0 AND UP!!!!

~~~~~

Plans for future Versions

ability to message one particular channel

ability to turn alot of stuff off

~~~~~

To install, be sure to make a backup of your current NRplugin.dll, calling it NRplugin.dll.bak
then, simply unzip NRplugin.dll to your NR folder!

Thats it!

~~~~~
