Me is teh quadra ^^

And what light said is right =)

Hi2u nopic, so good of you to post here and stupidly put your name backwards ROFL. Oh man...
Funny stuff...

And I was just talking to light about this too that I bet the commands dont work since he cant connect it to XWIS. Guess what, he comes crying back here to look for the WOL con script cause why? HE CANT MAKE IT ON HIS OWN ROFL.

Nopic, do yourself a favor and stop ripping k tnx. Its people like you that make bot makers not want to release their work. And for this reason is why I halted the better version of CFGuard and only keeping it private.

name backwards, rofl, man thats a good catch...

and blazer has gotten the right word for this "OWNT"
