Chronojam wrote on Fri, 30 December 2005 12:35 Most of the errors are the result of earlier errors confusing the validator. I'm sorry for not closing every tag I open when it's not needed and using Javascript in a few places if it offends you and makes your browser cry to itself.

Differences between how browsers deal with numbers is a little irritating, I'll fix the overflow maybe tonight after I eat something. Like, maybe in eight hours.

It doesn't offend me, I just don't bother with sites that don't display correctly.

It's things like having no doctype and invalid declarations that is probably making your site display incorrectly. If you don't want to fix it that's your business, I just thought you might like a bit of advice....
