Hi,

i use the Linux Renegade Server with the newest ssaow and brenbot.

The server with ssaow and brenbot runs perfect, but i have some problems with the protected nicknames in brenbot.

1. I register my nick in irc by the brenbot
2. I enter the Server
3. It shows me that i use a protected nickname
4. I wait 60 sec and it kick me

That is ok but now

5. I connect a second time to the server
6. Now the brenbot doesn't check my name and it doesn't kick me

Is that a bug?
