Subject: WMP 10 Fails to Work
Posted by icedog90 on Sun, 01 Jan 2006 20:14:32 GMT

For some incredibly annoying reason Windows Media Player 10 doesn't work in any browser for me. It works fine when I play files on my computer, but it's gone to hell in any browser. In Firefox it says I'm missing a plugin, even though WMP is installed, and Internet Explorer shows the player but it's all over the place and screwed up, and doesn't work. I've tried reinstalling WMP 10 twice, and I've tried searching Google for anything. There's nothing. Looks like homosoft screwed someone over again (Quicktime works perfectly in both browsers). I have a friend who has the same problem as me. We're both pretty much stuck and can't figure it out. Hopefully someone here has a solution?
