Can you stop posting comparisons involving sex and someone breaking into your house, i've said it once i will say it again, This is a game, although you may feel orgasmically towards it its not sex, and its not you're house being burgled, its a game! a video game!, Cheaters can cheat with RG and without RG, right now RG is helping n00bs kick out anyone who doesnt have RG, When the new RG comes out, I hear its going to be a big improvement and i will update my RG, Then hopefully we can truly cut down the cheaters in ren and start owning nubs without getting kicked out of the game.
