EA-DamageEverything wrote on Thu, 05 January 2006 14:10The current Problem is, that for Example DeathAdders Aimbot IS working with RG. It runs as a separate process in Windows.

When configured correctly, some cheaters use it with Snipe Characters often. Tunnels are the famous location of those people, like on Field or Canyon... If you got a player with more than 50-60 Kills on a Westwood Map (server 60-100% filled up), it's going to be unusual I think.

I dont know more Cheats which are working while RG is running (only tested this some time ago), but the question is= Will there be a fix against such Tools in Renguard 1.04?
Uh-oh, I think my point from light's RG thread has been made the hard way...I'll see if I can track down a copy and send it to Crimson...if she doesn't already have one...
Edit: aimbot (er...clickbot) found...guess I'll have to test it on the unfortuate bots of Multiplayer Practice mode! (and send it to Crimson somehow)
