true true

In the beginning with gdi attack the nod harv. You can even get c4 on it. With nod apc rush is a good thing to do.

Also note that you drive a lighttank over the hill and drive it up the stone entrance of the tunnel. Drive it at that platform and the AGT will stop hitting you and you can easily fire at the AGT. Gdi tanks will have to drive up the hill to start shooting at you. You wont destroy AGT but it will give you some points.
