I'm pretty sure he meant something like that one Red Alert modification that plunked Tiberian Dawn units in, mixed with the Red Alert ones. But that's just me. In any case, there's actually a PKG out there like that as far as I know. I forget what it's called, but it has Apocalypse Tanks and some other Allied and Soviet units in it, plus some stuff from the GDI/Nod series of games and I think a unit or two from Generals. Though I could be wrong about that one.
