Nothing big, just some fan site i found looking through google for images.

<http://members.lycos.nl/ccrenegade/game/game.htm>

It has a lot of neat information and pictures from the older version. I recommend the dev. team section, directly points out each member of the development team of one picture.

Just take a look if your bored, the site is dreadfully ugly, I might warn you guys. ( Might be too late. )

I've never seen some of the pictures in the art gallery.
