Mining the Hand is a COMPLETE waste on cityfly unless you've already lost at least two other buildings. It takes, guess what, 18 mines to fully mine the Hand, that's over half the limit.

It's not like you really need to mine on cityfly anyway, if you're playing the map right you should have a bunch of lights on the field anyway with an apache and a couple of saks covering the map. Getting a humvee past that is futile, and getting an APC past isn't very likely
