DJM wrote on Sun, 29 January 2006 13:57iPods are on thing that seriously piss me off.

They seem to be more of a fashion accessory than an mp3 player. They are overpriced, overrated, unreliable and added to that they just totally camp. In addition to this you have to use shitty iTunes to put music on the player.

Zen Sleek all the way!

I like my Shuffle, it was well priced and the build quality and battery life is great.

Plus I use the ml\_iPod plugin for WinAmp. Screw iTunes.
