No, I didn't realize you had a support forum, I've only used Night regulator once before, and it was a friend who helped me set it up, but he quit Renegade so I have no help with it.
Here is the Screen shot of my FDS settings

My main problem is setting up the IRC settings, the bot itself connects to the FDS, but will not say anything in-game, nor will it kick
Does Night Regulator need to be connected to IRC to be able to do stuff in the game, such as auto rotate text?
