If I delete the file and reinstall a fresh downloaded crack, it will not run renguard. So I uninstall renguard with the renguard installer and the reinstall it. After I did that the 4 mb crack turns somehow into a 312 kb game.exe. I repeated this step twice to see if there is some other explanation, but everytime the same result.

This really sucks balls, anyone else have this problem or am I just screwed ??? I'm no expert on this, but it looks to me like I get this thing through the RG network.

Does anyone have any suggestions?
