Well, I have taken on this job as of yesterday. Funny thing is I have never seen this thread before or I would have stepped up sooner. Dunno if Mac wants more then 1 programmer on this though. I'll let Mac decide.

Anyway, programming is my job, and I loved Brenbot from the start. So I'll dedicate myself to this project to the best of my abillities, getting a stable 1.43 out as soon as possible.
