guys, enough with the scripts, I no how to use them, I'm not a total n00b at mapping, I know how to script. heck I even scripted a GDI guard tower to have 4 ceiling guns on it, which also die with it. ./ anyways, il get some SS ASAP

The reason the 2 Turrets don't work is most likely there blind side is facing toward the GDI base (as the left one fired after i past the walls) but all other defenses work. also, you cant get a base kill, the only way to win is by beaconing the pedestal. which there is a real one, and a fake one. it's up to the player to find the right one.
