Hmm a slight problem. I was playing this map on moonlightshakers tonight and we came across a problem. It seems as if the GDI beacon pedestal in the infantry barracks doesn't work. I am quite sure of this because Nod nukes it 5 times, even once with 2 nukes, near the centre of the pedestal. Just making you aware of the problem if you didn't already know.

The map is excellen though, the new textures, sounds, vehicles and destruction animations work well.
