Anyone having problems with "old file not found" type errors should post the following:
Which file it is.

What size the file in their renegade folder is in bytes

Plus whether the CP2 installer downloaded patchall.zip or cp2.zip.

Do make sure you run download.exe from the renegade folder (the one with game.exe, game2.exe and scripts.dll in it).

When we release final version of CP2 through RenGuard, we will implement check to make sure that files in renegade folder are what CP2 is looking for.

Oh and guys, this is a Release Candidate. If you dont want software that may contain bugs, do not download and install this. Wait for the final release of CP2.
