Ok first off, introductions

I'm CFEhunter, i've been active in the community for years but havnt been on the main renegade forums before today.

The mod is for ren, it's an RA2 TC mod (excluedeing yuri due to engine issues)

For those of you who may have already guessed it, yes this is the old untold team, with a little extra help, however we scrapped untold due to community reaction.

Back to the point...

Site can be found at (link fixed) <http://apocriseing.byethost6.com>

the site has just started so the forums are a little empty, please take a look people

Team and needs,

Firstly we have alot of very nicely done models and some sounds.

However we have no experienced skimmers and we desperatly need an unwrap artist

thanks for reading.
