This lists all XWIS rules. There are NO bots allowed on XWIS, nor are you permitted to connect to the network with any software other than what's released by EA/Westwood. Hence, software created to page flood people is prohibited.

(Yes, I realize this makes WOLProxy against the rules but Olaf has known about this app since before we moved from WOL to XWIS and he knows what it does and has never voiced an objection so I know it's OK)
