Posting those programs get you banned, but you are lucky there is a filter.

If you think someone specifically aims for YOU, ask your ISP to change your IP, and in renegade, change your nickname.

Did you reinstall this way?

- Uninstall Core Patch
 - Uninstall Renguard
 - Uninstall Renegade
 - Delete Renegade folder (backup skins and maps you need first, but in this situation, you could as well not use any to see if it works)
 - Delete registry entries (if you know how)
 - Reboot
 - Install Renegade
 - Update to 1.037 (download it manually from [ftp.westwood.com/pub/renegade](ftp://ftp.westwood.com/pub/renegade) (updates folder))
 - Go online and play without Renguard or Core Patch to see if it works.
 - If it does, try installing RG. Try it now.
 - If it also works with RG, try Core Patch.
 - If it works THEN gg.
-
