Hi everyone,

It's been a while since i've left touch with the Renegade community, hope you are all well.

For those who don't know, in the past i have made programs for the game such as Ren Skirmish, RenWOLstatus, Renegade AutoComplete and Renegade BuddyList.

It's recently been brought to my attention that the buddy list app no longer connects, saying your "Serial is not in the database", which is misleading. Areilius posted feedback on TheCodeSmith.com asking if this was something to do with the XWIS change-over?

As I only know very little about this XWIS change-over, can you tell me if that is the reason? Have the WOL servers moved address? If any of you could share some light on the situation, that'll be appreciated. Especially if Blazer/Crimson/Dante and co could get in touch that would be good - I'm looking to get this fixed ASAP.
