Eddimondson wrote on Wed, 22 February 2006 11:03If i try to install CP1. a message comes up sayin

Old File not found. However, a file of the same name was found. No update done since file contents do not match.

This is meaning the file "Script2.dll"

I have tryed reinstalling Renegade but it still will not work.

Can some1 plz upload the "Script2.dll" file so i can download it plz.

Thank You
You mean CP2? That means that you do not have CP1 installed...install 1.037, CP1, and THEN CP2--we should have a combo patch for CP1 and CP2...
