On walls flying, if you're running low on life inside the wall, go to either the north or south wall and jump on it. While you're falling, keep pressing 'w'(or whatever key that moves u forward) until you get to the bottom. If you do it right, you lose either a little or no life . Uh you don't... SUX FOR U HAHA!

BTW... whats the difference between a n00b and a noob????????????????????????????????????????
