I want a stand_alone cp2 because I have all Renegade related things already installed on my pc under a folder I call "RenegadeUpToStandards". If for some reason I have to reinstall renegade I always have what I need to fix it up without downloading.

So far I have every official patch, Core Patch, Version of Renguard, alot of skins, mappacks, mods, scripts, 3rd party programs. So many things. My favorite folder on my PC. Subfolders keeping it organized. Why am I saying this? To give others the same idea

Well thats my dumb reason
